

KEVIN RODRIGUEZ

FULLSTACK DEVELOPER

Fullstack developer passionate about building intuitive, responsive web applications.

I enjoy translating complex ideas into clear interfaces and am currently focused on React, Next.js, and Supabase. Looking for opportunities to grow and collaborate on impactful software.

I've worked on a variety of projects, always focused on delivering intuitive and engaging web applications to deliver the best user experience.

STARRED PROJECTS

Studymate [↗](#)

- Built a modern web application that enables users to create, manage, and complete personalized study plans using AI.
- Integrated the OpenAI API to develop Mate, an AI chatbot that generates study plans, guides users through their goals, and provides personalized recommendations and task support.
- Leveraged Next.js, React, and Tailwind CSS to design a clean, responsive, and intuitive user interface.
- Used Supabase to handle authentication and store user data such as study plans, progress tracking, and chat history.
- Developed a backend API to handle client requests with data validation powered by Zod, ensuring reliable and structured communication between the frontend and database.

Quizzie [↗](#)

- Made a web application for creating quizzes. Users can view, play, and share their own creations.
- Implemented a highly intuitive and easy-to-use creation mode. Every detail was polished to ensure the best user comfort and experience.
- Added a dashboard so users can manage their quizzes or create new ones, along with a search feature for playing quizzes even without logging in.
- Used libraries such as Zod and JWT for quiz authentication and user session management.

SKILLS

- | | | |
|---------------|------------|-----------------------------|
| ✓ TypeScript | ✓ Next.js | ✓ Git & Github |
| ✓ JavaScript | ✓ Supabase | ✓ Figma |
| ✓ HTML & CSS | ✓ Astro | ✓ Good at getting feedback. |
| ✓ React | ✓ Node.js | ✓ Attention to detail. |
| ✓ TailwindCSS | ✓ MongoDB | |
