

# KEVIN RODRIGUEZ

## FULLSTACK DEVELOPER

Fullstack developer building intuitive, responsive, maintainable and scalable web apps.

I've built real-world apps for users to plan their studies or create fun quizzes. Focused on clean UI and smooth UX with modern stacks like Next.js, TypeScript and Supabase.

## STARRED PROJECTS

### [Studymate](#) ↗

- Created a modern web application that helps users to create, manage, and complete personalized study plans using AI.
- Integrated the OpenAI API to develop Mate, an AI chatbot that generates study plans, guides users through their goals, and provides personalized recommendations and task support.
- Built a clean, responsive UI with Next.js, React, and Tailwind, based on my own Figma designs.
- Used Supabase to handle authentication and store user data such as study plans, progress tracking, and chat history.
- Developed a backend API to handle client requests with data validation powered by Zod, ensuring reliable and structured communication between the frontend and database.

### [Quizzie](#) ↗

- Built a web application for creating quizzes. Users can view, play, and share their own creations.
- Implemented a highly intuitive and easy-to-use creation mode. Every detail was polished to ensure the best user comfort and experience.
- Added a dashboard so users can manage their quizzes or create new ones, along with a search feature for playing quizzes even without logging in.
- Used libraries such as Zod and JWT for quiz authentication and user session management.

## SKILLS

- |               |            |                             |
|---------------|------------|-----------------------------|
| ✓ JavaScript  | ✓ Next.js  | ✓ AI integration            |
| ✓ TypeScript  | ✓ Supabase | ✓ Git & Github              |
| ✓ React       | ✓ Node.js  | ✓ Good at getting feedback. |
| ✓ TailwindCSS | ✓ MongoDB  | ✓ Attention to detail.      |
| ✓ HTML & CSS  | ✓ Astro    |                             |
