KEVIN RODRIGUEZ

FULLSTACK DEVELOPER

I aim to create user-friendly, functional solutions that enhance the experience, whether by simplifying complex processes or adding polish to the final product.

I've worked on a variety of projects, always focused on delivering intuitive and engaging web applications to deliver the best user experience.

STARRED PROJECTS

Quizzie ⇗

- I developed a modern web application for creating quizzes. Users can view, play, and share their own creations.
- I implemented a highly intuitive and easy-to-use creation mode. Every detail was polished to ensure the best user comfort and experience.
- I added a dashboard so users can manage their quizzes or create new ones, along with a search feature for playing quizzes even without logging in.
- I used libraries such as Zod and JWT for quiz authentication and user session management.

Timeline Creator ⇗

- I created a web application for creating and viewing timelines easily.
- I implemented the Drag and Drop API for more convenience when adding images. I also used external libraries to optimize uploaded images.
- I added several keyboard shortcuts and options to improve the timeline creation process.

SKILLS

- ✓ JavaScript
- ✓ TypeScript
- ✓ React
- ✓ TailwindCSS
- ✓ Node.js
- ✓ MongoDB
- ✓ Astro
- ✓ Git & Github
- ✓ Fast learner.
- ✓ Attention to detail.
- ✓ Good at getting feedback.
- ✓ Adaptability.

EDUCATION

Universidad Simón Bolivar   2021 - Today
Multimedia Engineering   8th semester

LANGUAGES

Spanish, English
